

COMPANY OVERVIEW KARTS & PROJECTS

VERSION V3.0

WELCOME TO BIZKARTS

World leaders in Kart Innovation

BIZ Karts is one of the largest and most reputable kart manufacturers in the world. We are a family-run business, specialising in the design, development and manufacture of go-karts. Our karts are renowned for their driveability, strength and reliability. Every fleet of karts is custom built to order in-house, from the welding of the chassis to the assembly of components.

We offer a complete turnkey solution. Project consultation and start-up support, track design, barrier systems, timing solutions and training are just some of the services our packages include. Our professional team are on hand to provide on-going kart support and the spare parts you need to keep your fleet running smoothly and profitably. We have established a strong customer base across the world that benefits from our decades of industry experience.

WHO WE ARE

From humble beginnings to a global name

The BIZ Group was founded in London back in 1816. B.I.Z., which originally stood for Builders Iron & Zinc Work supplied sheet metal and building materials to the trade. Over the past 200 years, the BIZ Group has evolved and now consists of three companies employing over 70 members of staff in its North London factory. BIZ Karts, the largest of the three businesses was set up by Managing Director Mike Smith in 1994. We owe a lot of our success to our history. Our vast experience in engineering, metalworks and running successful race kart teams have shaped the products and services we are proud to put our name to. Whilst the early days focused on the UK karting market, BIZ Karts is now a global player in the rental industry. Over 1200 karts are manufactured in our factory every year and our go-karts can be found in most corners of the world!

AN AWESOME

Racing Experience

We handpick the best suppliers and deliver exceptional projects that enable you to offer your customers an awesome racing experience and generating repeat visits time after time.

Fast track your success

Take advantage of our vast amount of experience and leave the hard work to us. You will be appointed a dedicated project manager right from the start to guide you through the process of starting an indoor karting circuit. We will work with you to prepare budgets, carry out feasibility assessments and design your venue from the ground up.

Architectural Design Services

As well as designing your track, we can offer you a full Architectural Design service for your hospitality/facilities area, from concept design right through to a detail design, ready for you to obtain all local statutory consents through your preferred contractor.

We take a very commercial view to architectural design ensuring that we deliver a functional building to suit all our clients varying budgets and requirements.

We believe that successful architectural design is the perfect combination of creativity, functionality and sustainability. Regardless of your budget or size, you can be assured that all of our projects and clients are considered unique and of equal significance.

Multi-level Design

The multi level track designs enable you to generate maximum possible sales revenue from a smaller footprint. Your customers will be left in awe at the myriad of ramps. Perhaps the circuit requires something as subtle as a bridge or a flyover, possibly an elevated pitlane? Whatever you want that wow factor to be our team of dedicated professionals and partners will bring it to life.

PETROL OR ELECTRIC?

PETROL

Having built petrol karts since 1994, we possess a huge wealth of experience and knowledge. Our petrol karts have set the industry standard for commercial karts and the handling of our leisure karts is the best in the market. All of the karts we produce are designed and manufactured in-house.

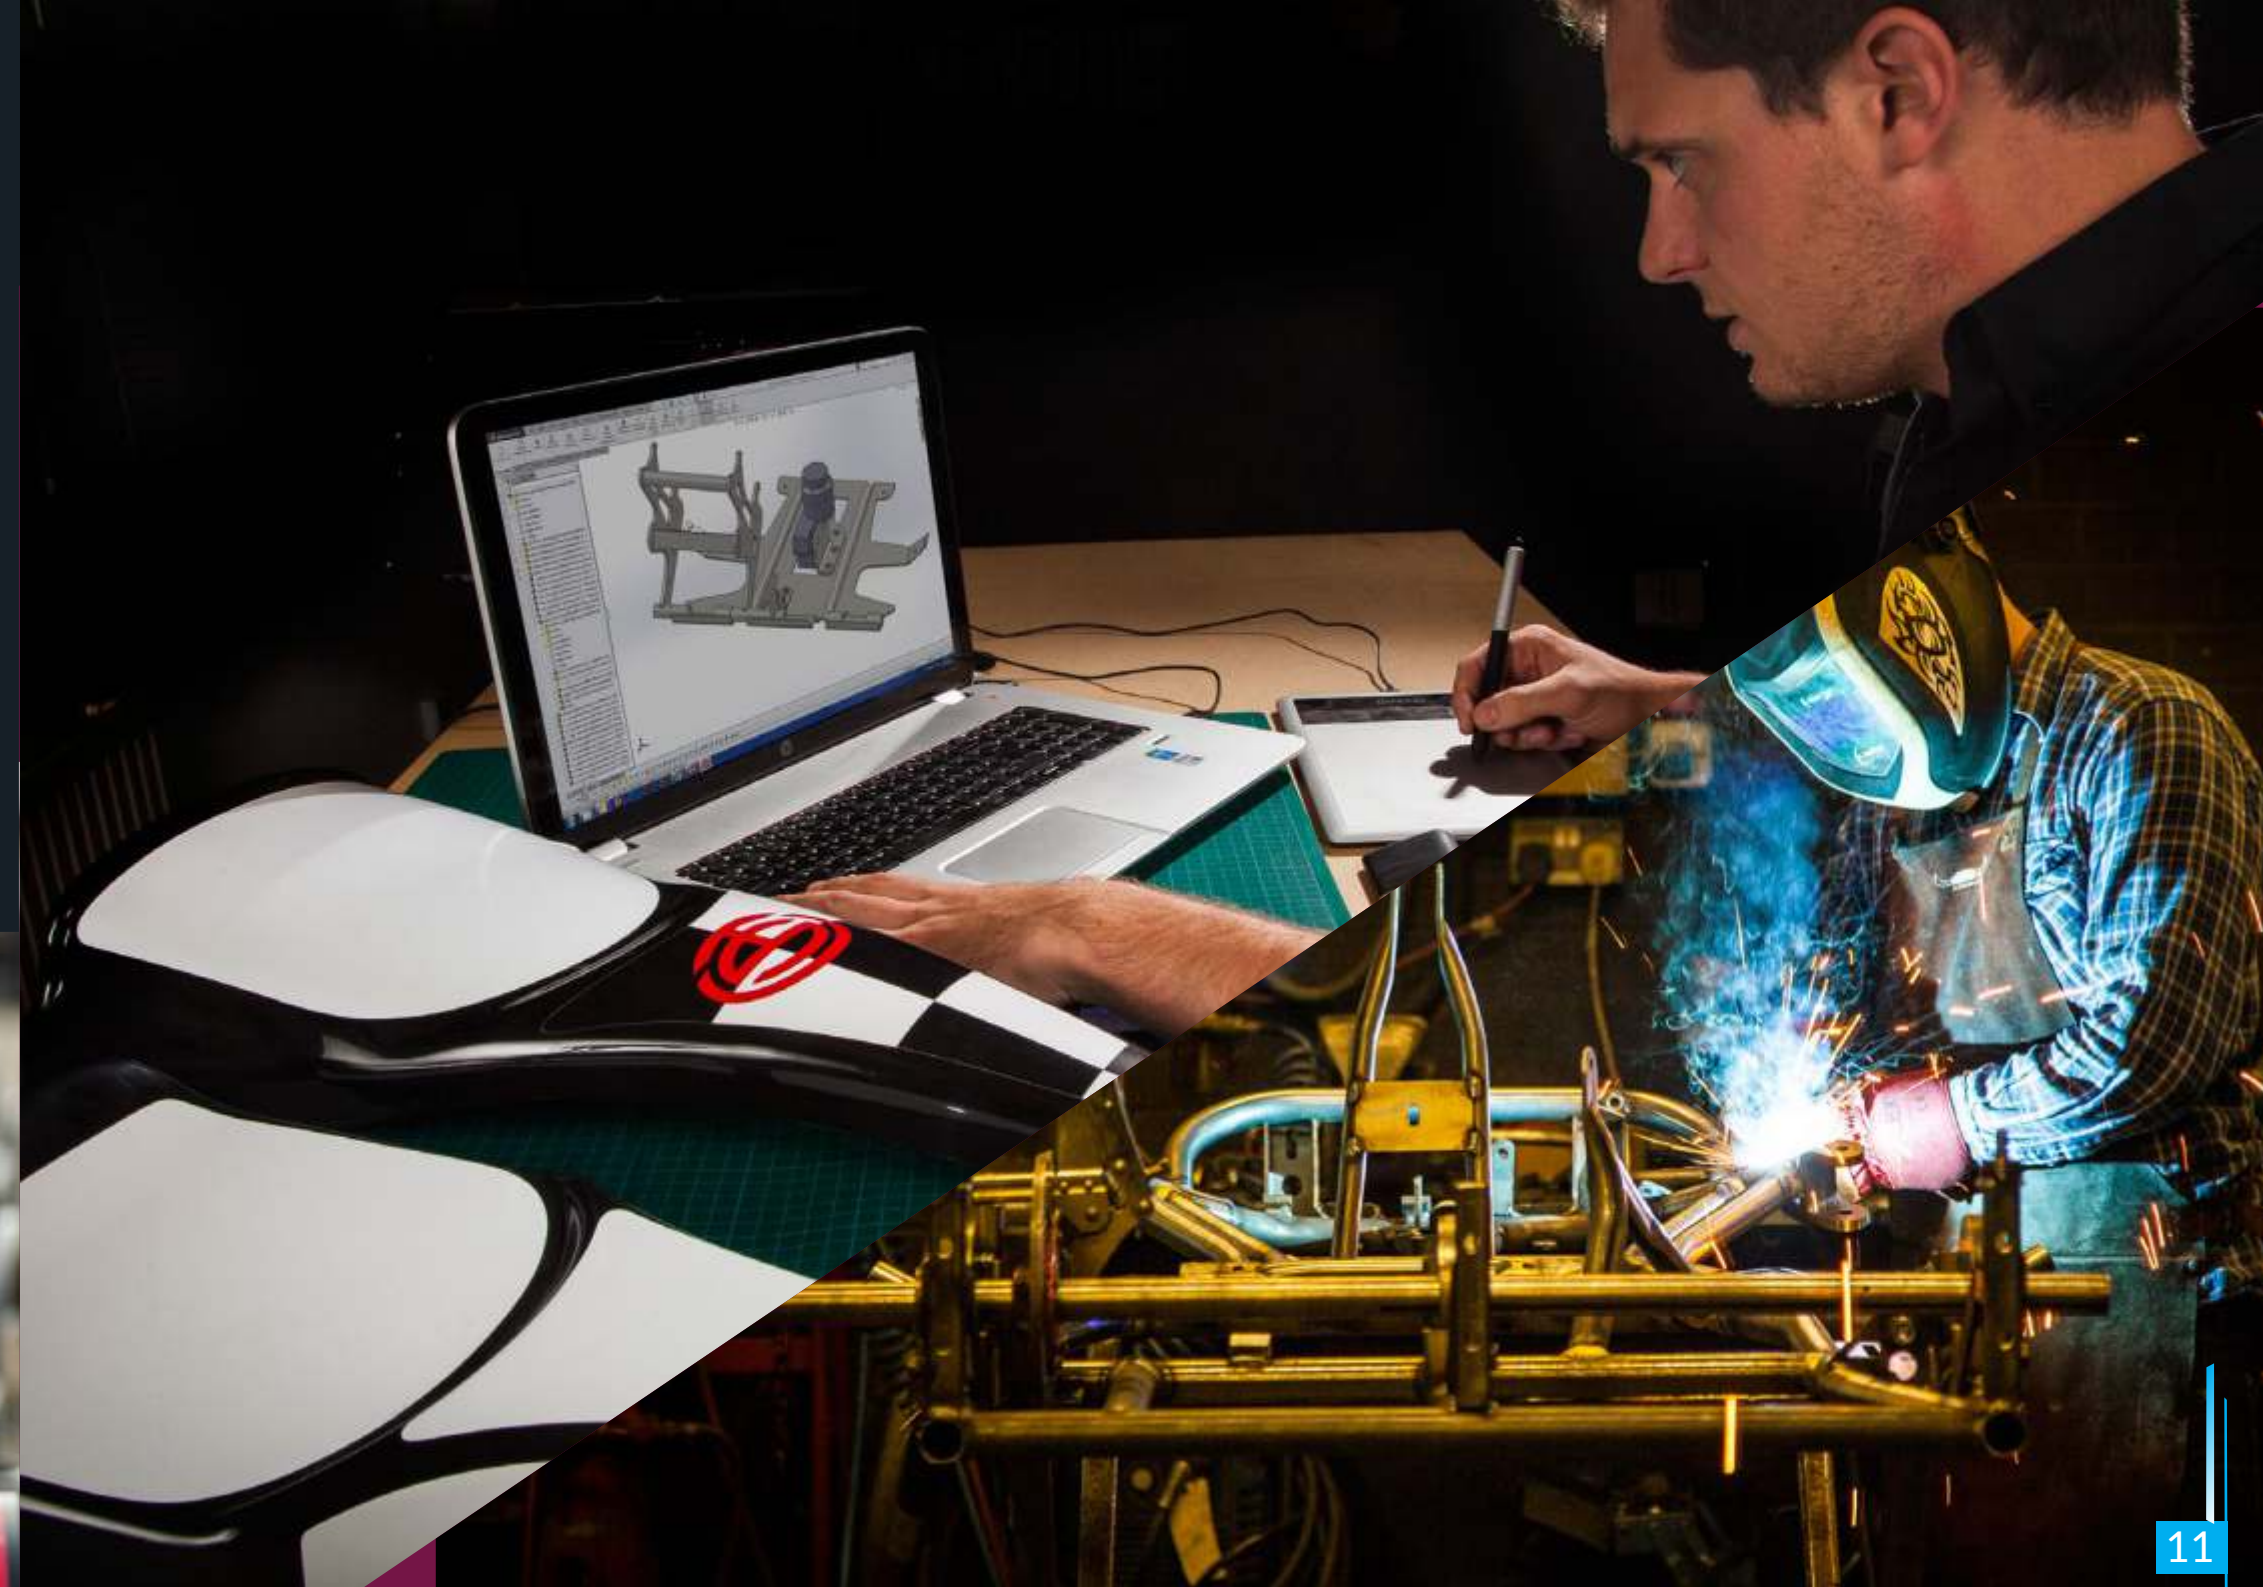

ELECTRIC

We manufacture the most technologically advanced electric kart on the commercial market – the GT. Our in-house electrical engineers have spent the last few years developing our electric kart, which offers an unrivalled performance and recharge times, creating the perfect solution for any commercial kart circuit.

ENGINEERING & DESIGN

BIZ Karts manufacture and deliver large fleet orders in short lead times to exceptionally high standards. Almost all stages of the fleet builds are completed in-house. "Precision Innovation" is not just a tagline. We have invested in the latest manufacturing technologies, including our state of the art fibre laser cutters, welding cells and CNC multi-axis bending machines. Our design team utilise the latest 3D CAD software. Designs are validated using state of the art FEA simulation tools and our newly added surfacing capabilities allow our designers to create aerodynamic and exciting aesthetics. Recognising the future in the electrification of our products, BIZ Karts have invested heavily in experimental equipment, including electric motor test cells, battery charge-discharge cycles and environmental chambers. This positions us at the forefront of zero-emission kart technology.

TURNKEY SOLUTIONS

BIZ Karts have been building karts now for over 25 years and are experienced in providing complete project solutions.

Packages can be fully tailored to your specific requirements. Some of the more key elements we offer include:

- A world leading electric and petrol karts used by some of the biggest names in the industry
- Exciting track designs that will ensure your customers return to you time and time again
- Some of the safest track barrier systems on the market
- State of the art venue management systems to handle event scheduling, live race timing, driver registration, point of sale and lots more
- Speed control/shutdown systems
- Approved helmets and race-wears
- A well thought-out inventory of spare parts unique to your requirements
- Training & Consultancy
- Development of Safety Operating Procedures and Risk Assessments
- Fully insured shipping and delivery with the most reputable shipping lines

PARTS & ACCESSORIES

Online Ordering

We have made the process of buying spare parts as convenient as possible with our online store. Purchase your spare parts whenever and wherever is most convenient for your team.

BIZ Karts Spares

BIZ Karts run a shop at the factory, selling parts and spares as well as merchandise, including race suits, helmets, neck braces and gloves. We hold most stock in our factory, so lead times are minimal. With our next-day courier services available in the United Kingdom, you can keep your business running smoothly.

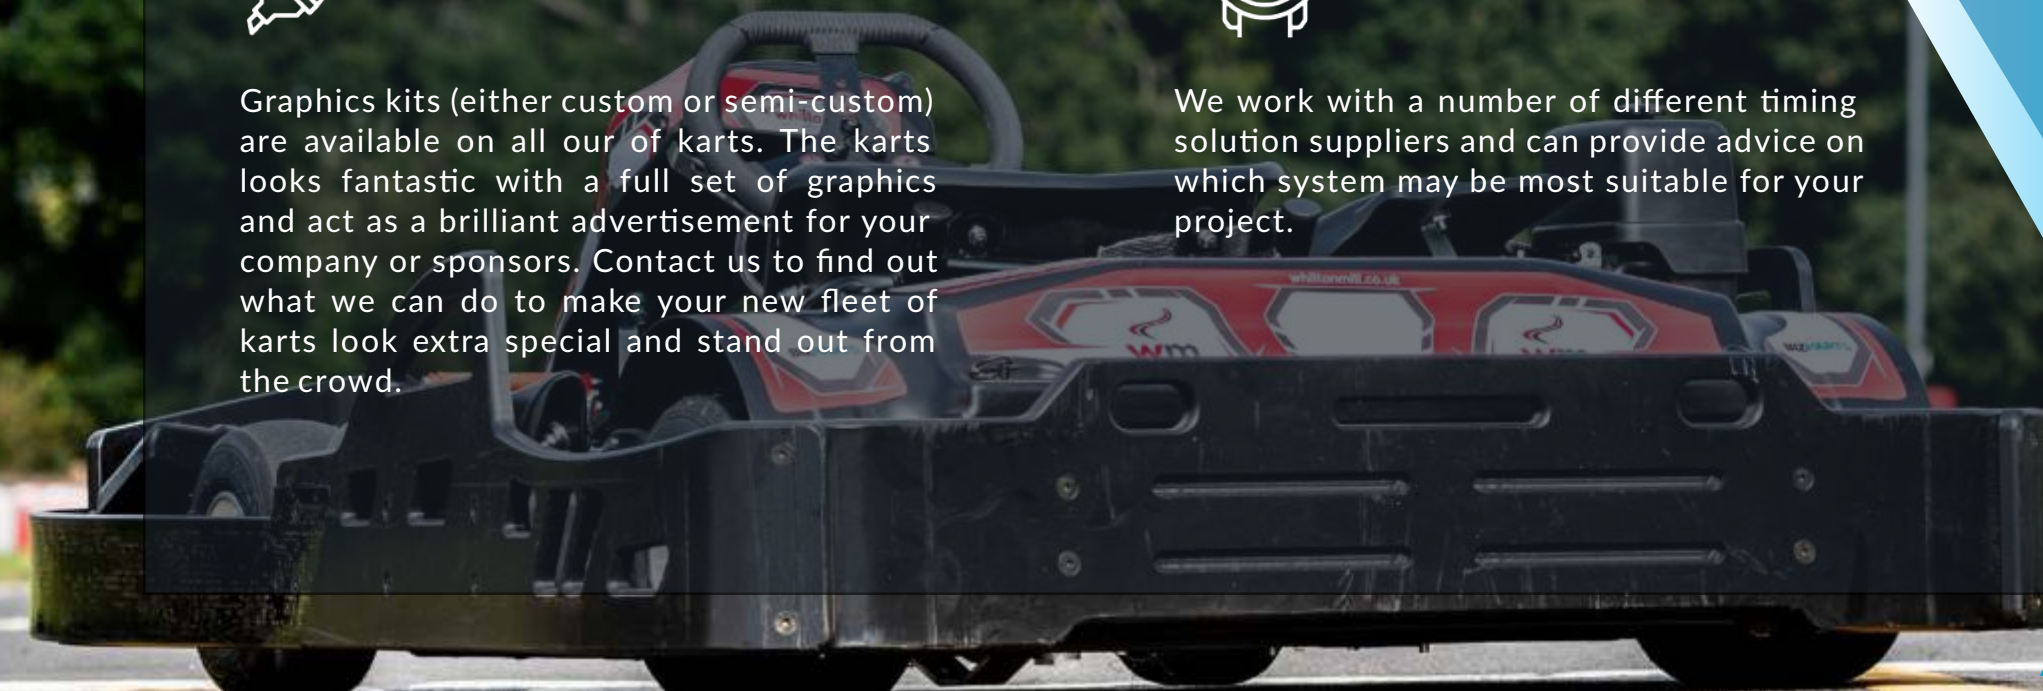

Custom Graphics

Graphics kits (either custom or semi-custom) are available on all our of karts. The karts looks fantastic with a full set of graphics and act as a brilliant advertisement for your company or sponsors. Contact us to find out what we can do to make your new fleet of karts look extra special and stand out from the crowd.

Timing Solutions

We work with a number of different timing solution suppliers and can provide advice on which system may be most suitable for your project.

WORLDWIDE SUPPORT

We operate a smooth and reliable distribution service supplying karts and spares to every corner of the globe. In 2017, we opened our online store which allows customers to browse and purchase spares and accessories at their leisure.

Our USA office in Fort Lauderdale, Florida offers the same excellent customer support to our customers in the USA, Canada as well as Central and South America.
