

▶ BIZKARTS

A person wearing a black racing helmet and suit is driving a black go-kart on a track at night. The track is illuminated with blue lights, and another go-kart is visible in the background. The overall scene is dynamic and high-tech.

2026 Overview

WELCOME TO **BIZKARTS**

WORLD LEADERS IN KART INNOVATION

BIZ Karts is one of the largest and most reputable kart manufacturers in the world. We are a family-run business, specialising in the design, development, and manufacture of go-karts. Our karts are renowned for their driveability, strength, and reliability. Every fleet of karts is custom-built to order in-house, from the welding of the chassis to the assembly of components.

We offer a complete turnkey solution. Project consultation and startup support, track design, barrier systems, mining solutions, and training are just some of the services our packages include. Our professional team are on hand to provide ongoing kart support and the spare parts you need to keep your fleet running smoothly and profitably. We have established a strong customer base across the world that benefits from our decades of industry experience.

WHO WE ARE

FROM HUMBLE BEGINNINGS TO A GLOBAL NAME

The BIZ Group was founded in London back in 1816. B.I.Z., which originally stood for Builders Iron & Zinc Works, supplied sheet metal and building materials to the trade. Over the past 200 years, the BIZ Group has evolved and now consists of three companies employing over 70 members of staff in its North London factory. BIZ Karts, the flagship entity established in 1994 by Managing Director Mike Smith, stands as the world's leading electric kart manufacturer.

We owe a lot of our success to our history. Our vast experience in engineering, metalworks, and running successful race kart teams have shaped the products and services we are proud to put our name to. While the early days focused on the UK karting market, BIZ Karts is now a global player in the rental industry. With an annual production exceeding 1200 karts total, our cutting-edge electric go-karts in particular are renowned worldwide for their innovation and performance, fueled by ongoing research and development initiatives aimed at pioneering more advanced electric kart technologies.

Three go-karts are shown from a top-down perspective on a dark asphalt track with white lane markings. The karts are green and black (number 1), blue and black (number 2), and yellow and black (number 5).

AN **AWESOME** RACING EXPERIENCES

We hand pick the best suppliers and deliver exceptional projects that enable you to offer your customers an awesome racing experience and generate repeat visits time after time.

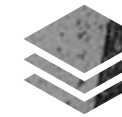

FAST TRACK YOUR SUCCESS

Leave the hard work to us! You will be appointed a dedicated project manager right from the start to guide you through the process of starting an indoor karting circuit. We will work with you to prepare budgets, carry out feasibility assessments, and design your venue from the ground up.

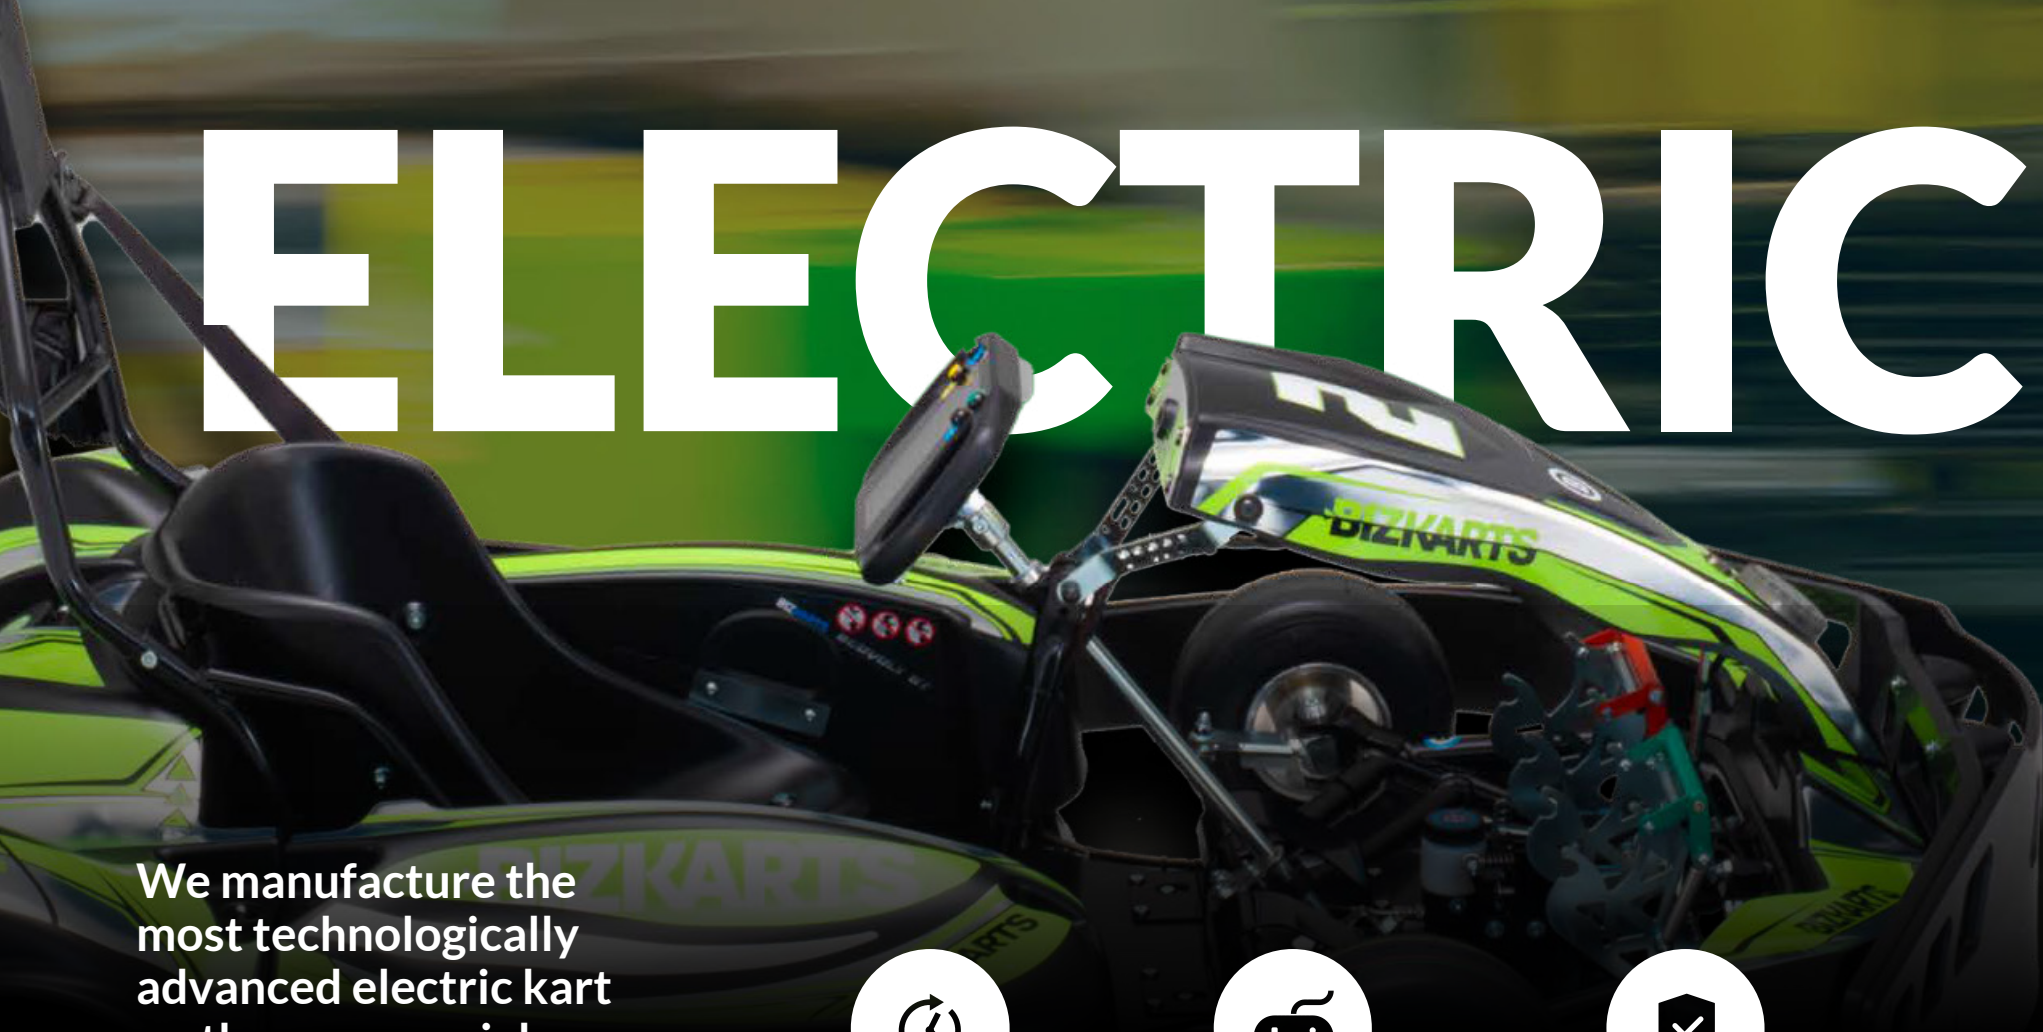

ARCHITECTURAL DESIGN SERVICES

As well as designing your track, we can offer you concept design right through to a detail design, ready for you to obtain all local statutory consents through your preferred contractor. Regardless of your budget or size, you can be assured that all of our projects and clients are considered unique and of equal significance.

MULTI-LEVEL DESIGN

The multi-level track designs enable you to generate maximum possible sales revenue from a smaller footprint. Perhaps the circuit requires something as subtle as a bridge or a flyover, possibly an elevated pit lane? Whatever you want that wow factor to be, our team of dedicated professionals and partners will bring it to life.

ELECTRIC

We manufacture the most technologically advanced electric kart on the commercial market - the EcoVolt GT. Unrivalled performance & recharge times, the perfect solution for any commercial kart circuit.

Future-proof your business

LIVE BATTERY AND
SYSTEM DIAGNOSTICS

Track Assistant is an advanced track-management platform, designed to give operators full visibility and control over every kart on the circuit. The system provides real-time monitoring of kart position, battery levels, and performance data, allowing staff to respond instantly to changing conditions. With individual and group speed control, operators can manage driver ability, regulate traffic flow, and enhance safety during each session.

Track Assistant also integrates directly with track lighting and safety systems, enabling quick activation of warnings and automated responses to incidents. By centralizing key functions into one intuitive interface, the software improves operational efficiency, reduces downtime, and ensures a smoother, safer driving experience. As part of BIZ Karts' complete turnkey solution, Track Assistant serves as the operational backbone of modern karting venues, supporting reliable fleet management and consistently high standards on track.

KARTING LIKE YOU'VE NEVER SEEN IT BEFORE

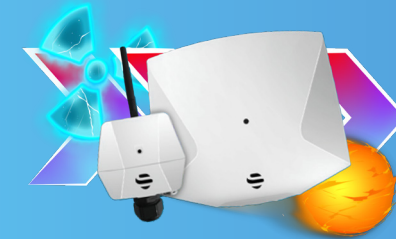

Super E blends karting with gaming, where drivers collect power-ups, manage energy, and race strategically. With on-kart screens and dynamic track elements, no two races are the same! Built for track owners, Super E keeps racers coming back. Are you ready to level up your circuit?

Super E is built for indoor karting circuits, combining the thrill of close racing with a retro gaming twist. Drivers collect rewards by passing through power-up zones, which appear on their steering wheel display. With the press of a button, they can boost their speed or sabotage rivals—but timing is everything! To stay fast, drivers must also navigate virtual recharge zones to keep their energy levels high. Every lap is a strategic battle for victory!

LIGHTING SOLUTIONS

Illuminate your track with BIZ Karts' advanced lighting solutions — designed to enhance safety, visibility, and the thrill of racing.

Take your track lighting to the next level by integrating it with kart lighting for a seamless, fully synchronized system. With advanced connectivity, the front and rear smart lights on your karts can mirror the track signals in real time, whether displaying green for go, yellow for caution, or red for stop.

This innovative integration not only enhances safety and communication during races but also creates a more immersive and visually striking experience. Kart lights can respond dynamically to race conditions, adding a new layer of excitement and clarity for drivers and spectators alike. Whether you're running casual sessions or competitive events, synchronizing kart and track lights ensures all systems work together as one, delivering a professional, polished, and unforgettable racing environment.

ENGINEERING & DESIGN

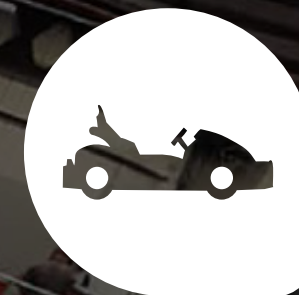

BIZ Karts manufacture and deliver large fleet orders in short lead times to exceptionally high standards. Almost all stages of the fleet builds are completed in-house. We have invested in the latest manufacturing technologies, including our state-of-the-art fiber laser cutters, welding cells, and CNC multi-axis bending machines.

Our design team utilizes the latest 3D CAD software. Designs are validated using state-of-the-art FEA simulation tools, and our newly added surfacing capabilities allow our designers to create aerodynamic and exciting aesthetics. Recognizing the future in the electrification of our products, BIZ Karts have invested heavily in experimental equipment, including electric motor test cells, battery charge-discharge cycles, and environmental chambers. This positions us at the forefront of zero-emission kart technology.

TURNKEY SOLUTIONS

BIZ Karts have been building karts now for over 25 years and are experienced in providing complete project solutions.

Packages can be fully tailored to your specific requirements. Here's some of the key elements we offer:

- World-leading electric and petrol karts used by some of the biggest names in the industry.
- Speed control/shutdown systems.
- A well-thought-out inventory of spare parts unique to your requirements.
- Development of Safety/ Operating Procedures and Risk Assessments.
- Fully insured shipping and delivery with the most reputable shipping lines.

- Exciting track designs that will ensure your customers return to you again and again.
- Some of the safest track barrier systems on the market.
- State-of-the-art venue management systems to handle events scheduling, live race timing, driver registration, point of sale, and lots more.
- Approved helmets and race-wears.
- Training & Consultancy.

TRACK DESIGN SYSTEM

Take advantage of our wealth of experience and leave the hard work of designing your track to us. At the start of your project, you will be appointed a dedicated project manager to guide you through the process. They will work with you to prepare budgets, carry out location feasibility assessments and design your karting venue from the ground up.

MULTI-LEVEL DESIGN SERVICE

Make the most of limited space with a multi-level track design that maximizes revenue and delivers an unforgettable experience. Our team will guide you through options such as ramps, flyovers and elevated pitlanes, ensuring your circuit impresses customers and fits your site and budget.

PARTS & ACCESSORIES

ONLINE ORDERING

We have made the process of buying spare parts as convenient as possible with our online store. Purchase your spare parts whenever and wherever is most convenient for your team.

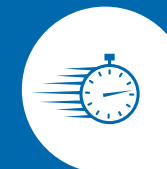

CUSTOM GRAPHICS

Graphics kits (either custom or semi-custom) are available on all of our karts. The karts look fantastic with a full set of graphics and act as a brilliant advertisement for your company or sponsors. Contact us to find out what we can do to make your new fleet of karts look extra special and stand out from the crowd.

PARTS & SPARES

BIZ Karts run a shop at the factory, selling parts and spares as well as merchandise, including race suits, helmets, neck braces, and gloves. We hold most stock in our factory, so lead times are minimal. With our next-day courier services available in the United Kingdom, you can keep your business running smoothly.

TIMING SOLUTIONS

We work with a number of different timing solution suppliers and can provide advice on which system may be most suitable for your project.

WORLDWIDE SUPPORT

DISTRIBUTION SERVICE

We operate a smooth and reliable distribution service, supplying karts and spares to every corner of the globe. In 2017, we opened our online store, which allows customers to browse and purchase spares and accessories at their leisure.

USA OFFICE FLORIDA

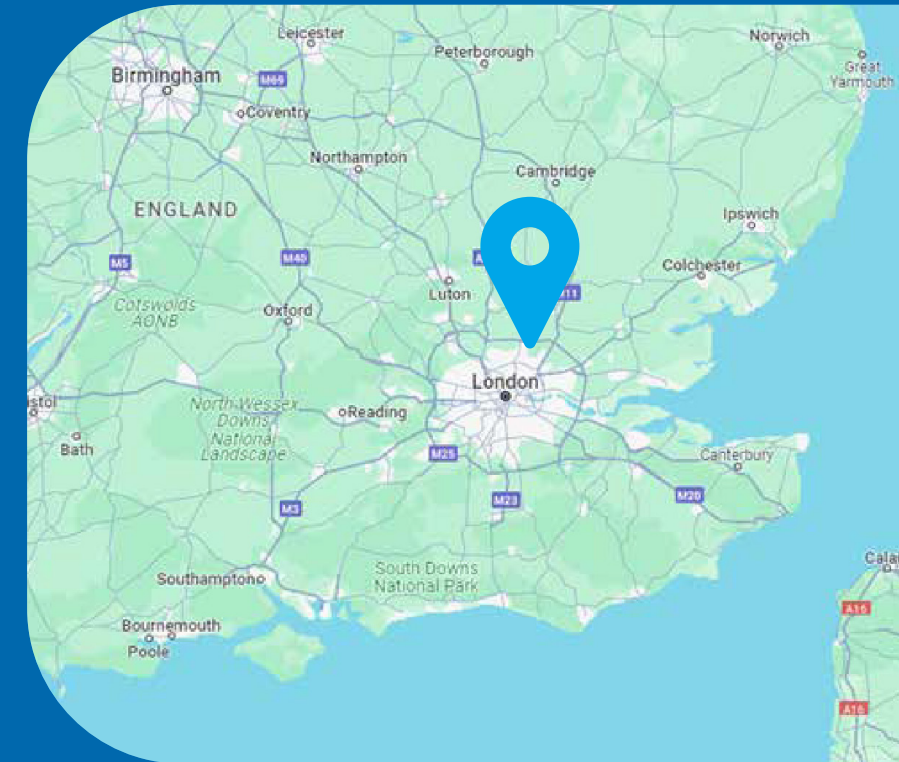

Our USA office in Pompano Beach, Florida offers the same excellent customer support to our customers in the USA, Canada, as well as Central and South America.

BASED IN ENFIELD, NORTH LONDON

For nearly 30 years, we've honed our craft at a shared facility with BIZ Engineering, establishing a legacy of excellence since our inception in 1994. In our purpose-built factory in London, we take pride in manufacturing over 1200 karts each year, with each one meticulously built to order.

Our commitment to quality knows no bounds. The shared space has become a symbol of innovation, enabling us to ship our premium products not only across the country but also to every corner of the globe. Throughout the years, our factory has undergone continuous refinement and redesign, a testament to our dedication to producing the highest quality go-karts in the industry.
